

I strongly believe it is only fair and democratic that the FCC, namely Michael Powell, give open and if wanted by the people and the Congress, lengthy hearings on the wisdom of allowing even more consolidation of our airways to be under the control of a very few media corporations. This should not be a business/profit decision. It should be to aid in the most open availability of information to the American people. The First Amendment isn't just free speech; we need free hearing too.
